## Financial Policy for Uninsured Patients

For our uninsured patients we offer a discounted office visit of \$125.00 and **payment must be made at the time of check-in**. If you are in the middle of an established course of treatment and you find that you cannot pay for your next visit at the time of service you must call the billing department and speak to Janet or Ashley before you come in for your appointment.

We also offer a discounted laboratory program for our uninsured patients that is lower than the usual laboratory fees. **All lab work must be paid for in full before the specimen will be sent out to the laboratory**. We also offer many injections, testing , and xrays at discounted rates for our uninsured patients but these fees must also be **paid for in full at the time of service**.

If you have any questions about any part of this policy please feel free to contact Janet or Ashley in the Billing Department. As always thank you for letting us be your Partner in Health.
